HEART AND SOUL STUDY

COGNITIVE FUNCTION

Now, I'm going to ask you a few basic memory questions.

Note to interviewer (Do not read to patient): No aids to memory, such as looking at a calendar or newspaper, or asking for hints, are permitted. Refusal to answer any question usually means that the patient does not know the answer, and the item should be scored as incorrect.

	Correct	Incorrect
1. What is the date today? (Exact month, day, year required) Y1COFX1	<input type="text" value="0"/>	<input type="text" value="1"/>
2. What day of the week is it? Y1COFX2	<input type="text" value="0"/>	<input type="text" value="1"/>
3. Where are you right now? (Any correct description acceptable) Y1COFX3	<input type="text" value="0"/>	<input type="text" value="1"/>
4. What is your date of birth? (Exact month day, day, year required) Y1COFX4	<input type="text" value="0"/>	<input type="text" value="1"/>
5. How old are you? (Correct if corresponds to DOB) Y1COFX5	<input type="text" value="0"/>	<input type="text" value="1"/>
6. Who is the president of the United States now? (Correct if knows last name only) Y1COFX6	<input type="text" value="0"/>	<input type="text" value="1"/>
7. Who was the president just before him? (Correct if knows last name only) Y1COFX7	<input type="text" value="0"/>	<input type="text" value="1"/>
8. What was your mother's maiden name? (Correct if last name other than subject's last name is given) Y1COFX8	<input type="text" value="0"/>	<input type="text" value="1"/>
9. Please subtract 3 from 20, and keep subtracting 3 from each new number, all the way down. (Any error is scored as incorrect. Entire series must be performed correctly: 17, 14, 11, 8, 5, 2.) Y1COFX9	<input type="text" value="0"/>	<input type="text" value="1"/>
